Vehicle Related Violations (VRV)

Vehicle Related Violations

The Vehicle Related Violations service will allow law enforcement agencies to submit electronic parking and other tickets along with attachments via JINDEX. These tickets will then be used to create a case within the JIS system and associate the ticket with the case. If the case already exists, and there is an exact match between the existing case and the ticket received, the system will associate the case and the ticket. During this process, the system will automatically create the necessary docket entries.

Once the case is created and the ticket is associated with it, the system sends the initiator a functional response which indicates the disposition of the ticket. In addition, the functional response will provide the initiator with error information in the event that an error occurred.

DX DATAEXCHANGE

DX Overview Demo

Once the case is created and the ticket associated with it, court personnel will be able to view the ticket, docket entries, and associated documents using the JIS and JABS systems. They will also be able to execute reports to assist in the management of parking tickets.

Vehicle Related Violations (VRV)

- VRV is a standards based data exchange using web service that enables real-time electronic submittal of vehicle related violations (parking and photo enforcement tickets (i.e., red lights, toll violations, speed zones, etc.)) from Law Enforcement Agencies (LEA's) to JIS.
- Everett Municipal Court was the original pilot court.
- VRV went live in Everett on November 19, 2009.
- The VRV Integration code is available on the DX Portal.
- An Expanded Pilot Project began in February 2010.

Vehicle Related Violations (VRV)

- October 2010:
  - AOC, DIS, and the City of Everett began “Performance Testing” to validate peak performance for the Group 1 Pilot Group.
  - AOC and DIS identify interdependence with the Inter-agency Electronic Traffic Information Processing (E-TRIP) redesign of the SECTOR application effort to enhance the JINDEX message exchange platform and allow records to be returned to the local agency Record Management Systems (RMS).
  - On-Boarding for Group 1 Pilot Courts must be delayed until the redesign effort is complete (March 2011).

Vehicle Related Violations (VRV)

- November 2010 - Pilot Groups notified of delay.
- Next Pilot Groups:
  - Group 1 – Original Target Date – November 2010 ***(Delayed to April 2011)***
    - Issaquah, Kirkland, and Lakewood.
  - Group 2 – Original Target Date – March 2011 ***(Delayed to May 2011)***
    - Fife, Tacoma, and Lynnwood Municipal Courts.
