GR 15 – What the Public Sees

GR 15 dictates that public index information is to remain for sealed documents and cases.

When the court seals *a case*, the case is to still show on the index, and the parties names are a public part of the index.

GR 15 – What the Public Sees

"The existence of a court file sealed in its entirety, unless protected by statute, is available for viewing by the public on court indices."

SCOMIS is in compliance; Odyssey is not

Subject: RE: WA - GR-15 Sizing Screen Shots

Hi All,

The total sizing (Portal and Odyssey) for this request is 2100 hours. The Odyssey portion of the sizing came back at 850 hours. SharePoint has been updated to reflect this and the enhancement request has been assigned back to Dexter.

Thanks,
Paul

The estimate is for 2100 hours and I believe the current hourly enhancement rate is $185/hour, bringing this in at $388,500. Some of this work could be done under the legislative mandate bucket, but that only contains around 500 hours a year (which might also be needed for other legislative requirements).
