JIS Disaster Recovery

CHRISTINE WINSLOW, INFRASTRUCTURE MANAGER
APRIL 26, 2024

AOC's JIS Disaster Recovery Efforts

- DR exercises are scheduled and executed twice a year.
  - Unlike the Fall test, the Spring test includes an outage experienced by the courts so that we can test connectivity through the Internet to our recovered systems.
- During each test Infrastructure tests procedures for restoring some subset of all our systems. At last month's test we recovered ACORDS, SCOMIS, DISCIS, Odyssey, OnBase, and Biztalk.
  - For the first time since we began testing in March of 2006, we recovered the JIS database (a.k.a. DB2) within 12 hours and the systems themselves within 24 hours.
