To Whom It May Concern:

Mr. Steven Baumgarten has been a longtime patient of mine. He suffers from mental illness, schizoaffective disorder, obsessive-compulsive disorder and has had brain damage from head trauma from assaults in past. He is at risk for being a victim of violence in the future. Future assaults/concussions will greatly worsen his risk for dementia.

He also has issues from second hand marijuana exposure which will worsen symptoms in Steve and the mentally ill in general. He also has insomnia from the constant second hand marijuana smoke and sleep apnea.

He is at risk for dementia because of these and other factors.

His obsessive-compulsive disorder makes him prone to wonder about questions in a detailed nature that have led to misunderstandings.

As have many mentally ill people in general, Mr Baumgarten has faced discrimination and bias in life in general.
