**To:** Faulk, Camilla  
**Subject:** Criminal Rule 4.11

To Whom it may concern,

The audio recording of witness interviews is essential to keeping an unbiased, complete record as to what the witness has said during the interview. Recording captures the tone of the question and answer, it captures pauses and other sounds which may not be words, but are relevant none the less. Recording does not leave out essential words or get behind. Recording is easy, it can save time, paper, and money. Recording does not paraphrase or summarize, each word is captured and an accurate record is created. All of this applies to the defense, the prosecution, and law enforcement.

Please adopt criminal rule 4.11 as proposed.

Thank you for your consideration,  
Ryan N. Gray
