Subject: My public comment

As a victim myself, I disagree with this. I do not believe our attackers should be able to represent themselves. Our miranda rights should be enough and an attorney should be given to him. I don't think us victims should have to face our attackers once again, to hear what they have to say, personally I believe they should rot in a prison cell for life. at age 13 I was raped and beaten and charges were dropped because I couldn't face my attacker, to this day I still couldn't face him. Our attackers and murderers should not have the freedom that they have, I don't see why judges are letting more and more convicts, sex offenders, murderers go without hesitation. Just so they can reoffend and hurt another family. Just isn't right. Protect us like they say they are! Cowlitz county judge stephen w does not have a good reputation. My opinion on him is not very pretty considering he was the judge for my case.
