

1. It is our understanding from RFP 09-01 that vendors need NOT submit a cost proposal for Deliverable 2,3 & 4. Rather, the selected vendor for Deliverable 1 would need to provide a detailed project plan and cost proposal at the end of their assessment (Deliverable 1). Is our understanding correct. Please clarify.

Answer: Yes, your understanding is correct.

2. Is AOC looking for high level project plan and technical architecture for Deliverables 2, 3 & 4 to be included at this time or only at the end of Phase 1? Please clarify.

Answer: AOC is looking for detailed project plan and project information to be delivered at the end of Phase 1. Once the deliverables are accepted, AOC will make a go / no go decision regarding whether or not to proceed with the phases 2, 3 and 4.

3. The Business Requirement Document (BRD) for Electronic Transfer and Processing of Vehicle Citations refers to PSR (Page 3, Point 6.1,122) and PKB (Page 5, Point 6.3.1). Please help us understand what these applications are in the context of this data exchange pilot project.

Answer: PSR and PKB are screens from our existing mainframe (3270) application. We expect to use screen scraping/pasting functionality with these screens to apply the business rules to the incoming ticket data.

4. Page 1, Point 4.4 of Business Requirement Document refers to the standards. We would assume these standards have been used in preparing the requirements in this document. Please clarify.

Answer: Correct. However, the National eFiling Standards document is to be used as the basis for details that might not be specifically addressed in the AOC requirements document.
