

ODYSSEY PC WORKSTATION SPECIFICATION

This document presents the PC workstation specifications recommended for compatibility with the core functionality of Odyssey software and the Odyssey courtroom operations software. Use this document in conjunction with the “Odyssey/Microsoft Compatibility Matrix” that shows the compatibility of Microsoft products with several Odyssey release versions.

Odyssey Navigator Requirements (R2016+)

COMPONENT	REQUIREMENT*
Workstation	Microsoft Windows Certified PC (nationally recognized brand)
Processor	Dual Core (minimum), Quad-Core CPU (recommended) (See footnote 1)
Operating System	Windows 7 Professional and later
Memory	4GB RAM (minimum), 8GB RAM (recommended) (See footnote 1)
Disk Space	40GB free disk space
Network	Gigabit Ethernet/member of a domain
Screen Resolution	1440x900 (minimum), 1920x1080 (recommended) (See footnotes 1 and 2)
Required Software	Microsoft .NET Framework 4.6.1 (automatically installed)

Notes

1. Although application does perform adequately for minimum specifications, optimal performance should be run on recommended specifications. In the event that application performance issues are attributed to minimum or lower than minimum specifications on the workstation, Tyler Technologies, Inc. will advise that the workstations be raised to recommended specifications.
2. Resolution is optimized for dual monitors. Any resolution lower than the minimum will restrict some usability of user interface of application.

Odyssey Assistant Requirements (R2014)

COMPONENT	REQUIREMENT*
Workstation	Microsoft Windows Certified PC (nationally recognized brand)
Processor	Dual Core (minimum), Quad-Core CPU (recommended) (See footnote 1)
Operating System	Windows 7 Professional and later
Memory	4GB RAM (minimum), 8GB RAM (recommended) (See footnote 1)
Disk Space	20GB free disk space
Network	Gigabit Ethernet/member of a domain
Screen Resolution	1024x764 (minimum), 1920x1080 (recommended) (See footnote 1)

Notes

1. Although application does perform adequately for minimum specifications, optimal performance should be run on recommended specifications. In the event that application performance issues are attributed to minimum or lower than minimum specifications on the workstation, Tyler Technologies, Inc. will advise that the workstations be raised to recommended specifications.

SessionWorks Judge Edition All-In-One Requirements

COMPONENT	REQUIREMENT*
Workstation	Microsoft Windows Certified PC (nationally recognized brand)
Processor	Quad-Core CPU
Operating System	Windows 7 Professional and later
Memory	8GB RAM
Disk Space	200GB free disk space
Network	Gigabit Ethernet/member of a domain
Screen Resolution	1920x1080 with 1GB video memory (touch-enabled display recommended)
Required Software	SQL Server Express 2008R2 or later

SessionWorks Judge Edition v4.x - Client Only Requirements

This is for a "client only" configuration where the Judge Edition system only runs Judge Edition (not SQL or other services) and is pointed to an "all-in-one" configuration.

COMPONENT	REQUIREMENT*
Workstation	Microsoft Windows Certified PC (nationally recognized brand)
Processor	Dual Core (minimum), Quad-Core CPU (recommended)
Operating System	Windows 7 Professional and later
Memory	4GB RAM (minimum), 8GB RAM (recommended)
Disk Space	20GB free disk space
Network	Gigabit Ethernet/member of a domain
Screen Resolution	1440x900 (minimum), 1920x1080 (recommended), with 1 GB video memory (touch-enabled display recommended)
Required Software	Microsoft .NET Framework 3.5 SP1 and 4.6.1
