Washington Courts Online Records Search provides access to public court records. “Smart Search” can be used to find court records by record number or party name (Last Name, First Name). Smart Search also has the ability to use Advanced Search Options to provide the system with more information to narrow your results. The following search tips can assist you in locating records when using incomplete information.

Search Tips

Tools that can help to perform a successful search include:

Wildcard – The Wildcard feature allows you to search for incomplete names and case numbers in the system. For example, searching a partial last name of “slat*” yield results such as “Slate” and “Slatt,” “Slattery,” and so on. To use the wildcard feature, type a portion of a name or case number, and then type an asterisk (*) at the end.

NOTE: There is a minimum of one character in a first name, three characters in a last name, and four characters in a case number to use the wildcard feature.

Names Are Not Case Sensitive. You can enter first, middle, and last names in uppercase, lowercase, or a combination of both. The search results are the same.

HINT: When looking for a name that could contain a space, hyphen (-), or other separator you might need to conduct more than one search. For instance, if searching for the last name of McDonald but are unsure if there is a space between the ‘c’ and ‘D’, you should search twice – once with McDonald and another with Mc Donald. Same for similar separator situations.

Search results will only display the first 200 results. To narrow the search: add additional or more specific information; choose a specific location if you are searching ‘all locations’; change the ‘date range’; or pick a specific ‘case category’.
