Washington State Center for Court Research Launches Racial and Ethnic Disparity Dashboard

By Washington State Courts

The Washington State Center for Court Research (WSCCR) has launched a [Racial and Ethnic Disparity Dashboard](#), an online tool allowing WSCCR to update and display comprehensive data on disparity in court-involvement for people according to race, ethnicity, and gender. The dashboard presents data on disparity measures and disparity drivers such as case filings and charges relative to population, which can be filtered by county, court level and quarter.
