# PROJECT GOALS

Describe women incarcerated in Washington State.

Examine whether women of color are over-represented in the incarcerated population.

Begin to address the absence of information focused on incarcerated women using existing data.

## RESEARCH TEAM

Jennifer Bright, Freedom Education Project Puget Sound

Elizabeth Hendren, JD, Northwest Justice Project

Miranda Johnson, intern, Seattle Central College

Dr. Tatiana Masters, independent research consultant

Dr. William Vesneski, JD, University of Washington School of Social Work

# RESEARCH QUESTIONS

1. How many women, from what race-ethnicities, were convicted and sentenced in each offense category?
2. How many women, from what race-ethnicities, were convicted and sentenced in each of the four largest counties, and in two areas of special interest?
3. Were women of color convicted and sentenced disproportionately within each offense category?
4. Were women of color convicted and sentenced disproportionately within the counties examined?

## CRITICAL TAKE-AWAYS

- A total of 4,994 women were convicted and sentenced in 2019.
- Black and Indigenous women were significantly over-represented in sentenced populations compared to Census data.
- Statistically significant racial disproportionality existed in all 6 offense categories...
- ... and in five out of six geographic areas examined.

# THE DATA

- Caseload Forecast Council (CFC) data:  
Felony judgement and sentence forms submitted to CFC by counties for fiscal years 2000, 2010, and 2019
- US Census data used for disproportionality analyses
- Differences between these data sets detailed in our report, but in brief
  - Could not analyze disproportionality as it affected Latinas due to different categorization methods
  - “Asian American” category may obscure differences for Pacific Islanders
  - Report includes recommendations to improve future data collection and enable better disproportionality analyses

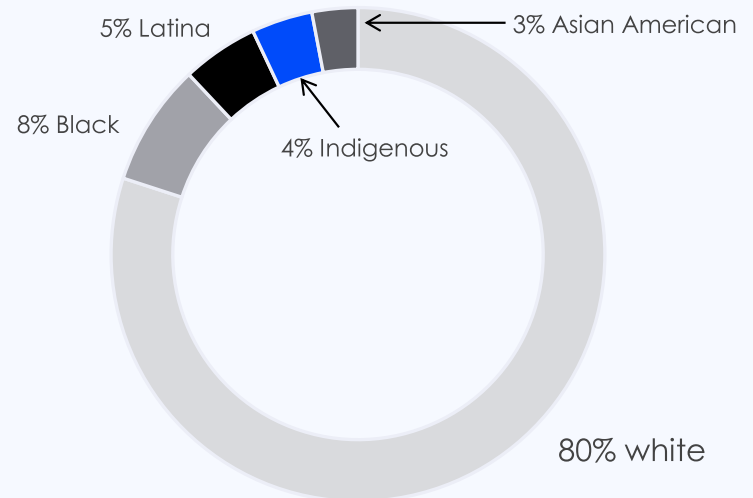

# QUESTION 1

HOW MANY WOMEN, AND FROM WHAT RACE/ETHNICITIES, WERE SENTENCED IN EACH OFFENSE CATEGORY?

# WOMEN SENTENCED TO FELONIES IN 2019

## RACIAL DISPROPORTIONALITY IN SENTENCING DIFFERENT ACROSS OFFENSES

2019 data	white		Black		Indigenous		Asian American	
	Census	CFC	Census	CFC	Census	CFC	Census	CFC
Drug (n = 1607)	79%	85%	4%	5%	2%	4%	9%	2%

# QUESTION 4

WERE WOMEN OF COLOR SENTENCED DISPROPORTIONALLY WITHIN  
THE COUNTIES EXAMINED?

## SUBSTANTIAL RACIAL DISPROPORTIONALITY IN SENTENCING ACROSS REGIONS

- Statistically significant differences in proportions of racial groups between 2019 CFC and Census data in 5 of 6 areas: King, Pierce, Snohomish, Yakima, and Spokane counties
- Black and Indigenous women were sentenced at a higher rate than we would expect based on their proportion of the population
  - Black women: Two to three times more
  - Indigenous women: Two to four times more

# KING COUNTY (2019)

	Census population	Sentenced women
white	66%	57%
Black	7%	29%
Indigenous	1%	4%
Asian American	19%	4%

No comparison for Latinas due to inconsistencies between data sets

## Racial Disproportionality in Sentencing

# THE COMPLETE REPORT

- Presents data from all three fiscal years (2000, 2010, and 2019)
- Racial group comparisons for all six regions
- Descriptive data on men compared to women
- In-depth explanation of our analysis methods and the limitations of the data
- Recommendations for future research questions and improved data collection
